DEC TRESS MERGYS I will write and tell you how l the 11 f in 15 n ght and, suit im getting in in, at the station. There is all then was a hot time in the old ire about four hundred and hitsy boys at In the a milital a mile when we got the lively Io day we had buttalion drill with about three hundred boys marching and made a. We to we look the line along we vere inspected by an officer who stood the roul and wated for two Maxim gams and looked at the drill. In the army they would call it 'dress parade ' lie days are getting mor now and we go out rowing fred viril through the first rice patch we im the bay over to Fort Adams. Along the

er ast there are large stone buildings with awns in front. They are su niner resorts r tich people of New York and other ties. Vanderbilt has a summer resort here. We have san dr li on the old Constellation about twice a week, where we have to run the rigging up to about one hundred and fifty feet at the highe t and url and loose earls. There are three musts or and thre algged ship the fore, main and niven masts and on each mast there are our yard a ms, upon which are bent sails which we have to furl. This is the kind of a frigate that we are trained on when

We are also taught gunnery, signals tac tics, physical exercise and books. One hour we may be in the rigging of a ship learning somethin_

and the next hour we may be studying books So you see we are thwo ye doing or Our food is good and we march to dinner with a band of buglers and a few drum

mers, which make fine music There are about a dozen buildings on the island of which all but one are for the boy, and that is the 'War College, 'which : for the the oilicers to study the art of war The new buildings, which are built to ac commodate one thousand boys, are nearly completed This Station, which is the same as an reademy, is situated on Coast ers Harbor Island in the Newl ort Harbors and is supposed to be a healthy place and

I find it so We sleep in harmocks, which are swing in the building called the which are swing in the building called the 'Gymnasium'. We wear white duck clothes which we have to scrib every day, and our blues on 'onday. Our clothes have to le clean because they are inspected every day at quariers at nine fifteen a m br an other who comes along and looks to see if all the durly spots are scrub bed off.

bed off

We use the Lee Straight Pull Rifle and the Cotts Navy Revolver when we have drills and target practice. The target practice with the big guos, such as the four-inch and others, it given on a gunnery tag, which goes outside the harbor and free at floating targets. We have artillery drill here about once a week, but have not yet field any of the landing guns, but we have the different movements while at the bat tery.

SOME ACCOUNT

SCOTCH-IRISH SETTLEMENT

ADAMS COUNTY.

About 1747 Semigrants from the north, was almost invariably a man of libert the negroes. We just got outside the of frehind and Scotland settled in the education and deep picty, with elecsouthwestern part of York county on the people, and was not only then all pland (now Adams county) They were the bit was often the instructor of the young first settlers in that section of the country, in a secular way. The occupations in the the Germans having established a colony, people in rural districts in the early Wilk, Arts Wilstail Connect Wilk under the healership of Andrew Sci river, sett ements, were unitvorable to the supn the southrastern portion of what is now port of schools except those of in their sense or there oull be known as Advas county, three years pre the nentary character and for short terms

> strip or belt of country a out ex miles they will seek means to sure y then wide beginning it a point two or three physical requirements. Not titil th nules north of Hunterstown and extend means of eletter and subsistence in line ing to the Muryland line a distance of measure leen accured for themselv and we we or fourteen miles, embracing in its those depend at upon those 3 d the cope Gettysburg and Hanterstown she sturd colonists of the Marsh cree whole of (umberland township and por m it give in ich attention to the carrier tions of Straban, I rank in Treedom, and education also a slice of Carroll a Tract - This settle | Tract arliest elementary school 1611; ment was reparted from the Cumberland the present limit of the county of w valley on the west by the South Younts n, there is any record, was established in the range of hills about ten miles acriss (mewago Settlement at Christ (hu ch at a over the Alexander n

These settlers were a highly respectable community mail, energetic industrious time prior to 1747. Te event Mish te and intelligent of frugal and plan hab ta kind friendly and hosp table They gave early astent on to the claim in sionary in 171. Thosel of which be l education and religion. VISITING GETTYSBURG.

We understand from these who have information that Gettysburg will be visited this summer by a larger number of military organizations and tourists than for many years past and that the season will be a good one, from a bus ness standpoint, for those engaged in farnishing the various accommodations required.

The Battlefield of Gettysburg, a National Park, is being improved each year of Adams county, district delegates to the with magnificent drive-ways and handsome monuments, and is being beautified of York, was elected Presidential elector in many ways. It is rapidly becoming from the district. The following conferens recognized as the most thoroughly mark- | were present: Adams county, W. B. Mced, most beautiful and altogether the Hhenny, W. S. Schroeder and A. B. Black; most interesting of the battlefields of the Comberland county, C. S. Brinton, J. M. Nation. It naturally attracts visitors and will grow in attractiveness each

The beauty of the natural scenery surrounding Gettysburg, often spoken of and admired by strangers, also adds to the pleasure of a visit to this place; and it is likely that not only will interest in Gettysburg live, but that from year to Quay man, and he will carry the fight into year it will become more widely known as an inviting point for tourists. It is national in its significance and

will continue to be a place of national interest.

MR. MERINLEYS IN CREALISM. In calling attention to Senator Hoar's masterly and elequent exposure of the wickedness and folly of that policy of noperalism upon which the present Ra publican Administration has embarked we could not retrain from characterizing as "almost childlike" the tenacity with which the venerable Senator chags to his faith at the Republican party and in President McKinley. No man sees with clearer vision than he, and no man has pointed out in language more vigorous and convincing the dangers to which this Republic and republican institutions are exposed by a continuance of that policy. "I believe, Mr. President," he says, "that perseverance in this policy will be the abandonment of the principles upon which our Government is founded: that it will change our Republic into an empive; that our methods of legislation of diplomany, of administration must hereafter be those which belong to his 80th year. He is survived by five empires and not to republics." But when he sees any prospect, or the possiversal of this policy, except through the expulsion from power of the present Retribe of McKinleys, Mark Hannas, Forakers and the like, he must be gifted with an acuteness of vision and an amount of elder of the Chambersborg district, preachprescience not vouchsafed to any other of ed at Salem church on Sunday morning. the sous of men. Yet this is literally his position. "I do not expect," he says, McDannel on Sunday. "to accomplish anything for liberty in the Philippine Islands but through the Beamer, of this place, attended the meetthese islands for years to come is to the Woman's Missionary Society in Handepend. If that party cannot be per-

wise what we do within the next 12 months could not be undone without the near Arendtsville, were in the Valley over consent of a Republican Senate," The power of muschief within the next 12 months possessed by the present Republican majority in control of both houses of Congress and the Executive Senator Hoat does not exaggerate. The only thing which can arrest and prevent the exercise, or rather the abuse, of that power will be such a rebuke administered at high moon Tuesday, at the home of the by the American people at the polls next | bride's parents, in Biglerville, when Mr. its policies as will call a halt in what Kime were married by Rev. U. A. Han-Senator Hoar biuself admits to be the key in the presence of a few invited downward road to min. The re-election friends of the family. Mrs. Eliza C., wife of John W. Tipton, The tuneral took place on Friday after

noon, with interment in the family lot in Evergreen Cemetery, Rev. Dr. T. J. Bark iey officiating. The bearers were H. T. burg, and Key, Stanley Billheimer, a Yasaangton.

Beside the husband, the following sons at the funeral, survive : Mrs. I. N. Smye iy, Prof. Ira L. and Miss Little Tipton, of thiladaiphia, Dr. Karl F. and Misces Car rie and Nellie at home.

District Attorney J. L. Williams received telegram on Friday from Columbus, Only, announcing the death of Charles A. smith, of this place, which occurred in Columbus that morning, resulting from a rathoad accident. He immediately communicated with the lather of the deceased Mr. Joseph J. Smith, who wired the anthorates to have the body sent here.

The young man left Gettysonrg for Lan-Navier church, were services were held. udicating death from internal injuries.

ather T. J. Crotty officiating. Yesterday afternoon Francis I. Smith reaved a newspaper clipping from the Coro er of Columbas, which says: This morning some section men, walking

had struck imm was but a few miles away. The body was placed on an engine and was brought to the Pan Handle shops, where it was held pending the arrival of the Coroner and No. 3 city patrol wagon. The young man had evidently just started across the bridge, when a train, running at a high race of speed down the grade, settek him. The body was harled to one eide, and when it was picked up it was found that there was a bad gash on the top of his head, and that his back and himbs were badly braised.

From papers found on his person he was identified as C. A. Smith, of Gettysburg, tad struck him was but a few miles away

The subject of growing corn on clover sod is one that is of much importance to the coin grower. Some successful farmers plow the clover sed in the fall, others plow at intervals during the winter. some plow in the early spring, while others advocate late plowing just before planting time. There are none of these different periods but have their apparent advantages and most of them have their disadvantages also. Fall plowing, if done before the clover plant becomes dormant, has the advantage of retaining in itself, all the more available elements of plant growth, coupled with the satisfaction of being ahead with one's work The catch playing during the winter, WITH MY EXPERIENCE OF OVER when the farmer would otherwise be dle, seems like a clear gain of that much time, but any one who looks after l interests closely will find a loss of the richest and most available properties of the clover by following this plan. The done before the clover plant commen ces its work of drawing from nature store houses, the air and deep sub-soil. The best results can only be obtained from plants that are in active duty And not only is this true of clover but of all animals as well as plant life. The best time to play clover sod is in the late spring but the work cannot always be ne then on account of other work coming on. Fall plowing is not good for the reason that the time is too long between the death of the clover and planting of corn. Decay is far advanced and the most valuable element, phosphoric acid, out of the reach of face feeding corn plant. Winter plowing is not advisable for the same reason as stated above, with the further objection of turning the clover under when it is in a dormant state, and in many instances it resumes growth when the season comes around for it to do so, to the detriment of the succeeding crop. To sum it up, plow as late in the spring as possible. Mellow the ground soon after plowing, leaving a level but not a smooth surface. Plant the carn on the fresh stirred, mellow soil and cultivate not too een. While the corn is young harrow and roll as often as you can, and in the meantime the warm a sisture will be

The aim of the careful corn-grower to prepare the ground and plant the seed in such a manuer as to admit of cultivation that is of most benefit to the grow ing grop and at the same time most convenient for himself and team. He also der the plant food of the soil of easy ac cess to the corn plant, and last but no least, he wants to secure as large a yie as possible. In all of these things drilled orn has many advantages over tha while the roots are small, should be deep er and neater the corn than any succeed ing one. In drill corn the farmer has a line stretching through his field, no wider than a corn stalk, all in a straight row. and he can get as close to the corn as he wishes. Often in later plowing, especial rows are torn toose and broken off. Now in Grilled corn the routs in the row, not the plant while the broken roots are destroyed on all sides and growth is DRUGS & BOOKS checked. A weed in a hill of corn can neither be covered over, nor cut out with a hoe, it must be pulled out. When corn is planted sixteen inches apart in drills, each plant has 201 square inches of ; feeding ground within a radius of eight inches. Now put three stalks in hills A. D. Buehler & Co. and the radius must be extended to nearly fourteen inches to furnish the plant, for in a radius of eightinohes each Drugs, plant would have but sixty-seven square inches of feeding ground. For the above reasons, drill corn out-yields hill corn both in fodder and grain. Fully maetenths of the farmers in this vicinity plant in drills. Many of them have two-horse planters but use them with the drill attachment, -- Writers in the Proble

rapidly forming plant food to be in reach

as the roots require it.

FUTURE FUR APPLES. At the last meeting of the Massachu setts Horticultural Society, S. D. Willard of that state said that the prices of apples have been steadily advancing until for several winters they have been held so high as to be beyond the reach i of the masses, and good No. 1 apples are a luxury to-day. They are shipped to all narts of the world as green fruit, canned and evaporated, while the skins and core are converted into joilies, so that nothing is lost or wasted. A few years ago our surplus of this truit was marketed in the British Isles, while to-day the German states and Russia are calling loadly for them, with the probability that our newly acquired possessions, both in the Atlantic and Tacific, will soon be numbered among the consumers of this king of all fruits. Seven conaties in western New York are said to have re-ceived from their apple crop not far from \$5,000,000 the past season, while at the same time receiving handred of thou-sands of dollars from their pears, plums, peaches, quinces, cherries, apricots and small fruits. Is not the outlook full of smail froms. Is not the outside that of encouragement to the orchard man, as well as to the land owner who may have found his work unsatisfactory in fighting competition which will never be less. From regions unfitted by soil or climate well as to the land owner who may have found his work unsatisfactory in fighting competition which will never be less, from regions unfitted by soil or climate conditions for growing fruits that can be produced nowhere class as well as in New York or New England? There should be an increase of area for the production of this fruit on the cheap hands now so abundant throughout this region, according to the production of the late Act of the Legislature, approved May, 19th, A. D. 1893, it will be seen that all Deeds and Conveyances made and executed after the passage of this As, SHLL be recorded in the office for the Recording of Deeds, etc.

HOLIZWORTH BROS., Propr's fault of the late Act of the case is all of it is not wanted for feed. If all of it is not wanted for this is used for bedding and goes to increase the manuer heap. The immense cob makes the corn unfit for feeding on the ear, but most eastern farmers consider this region, according to the corn and stored for feed. If all of it is not wanted for this purpose, it is used for bedding and goes to increase the manuer heap. The immense cob makes the corn unfit for feeding on the ear, but most eastern farmers consider within ninety days or else be adjudged within an analysis of the purpose.

CATARRH: FORERUNNER OF CONSUMPTION.

Few realize what a deep-scaled, obstinate discare Catarrh is, regarding it as a simple inflammation of the nose and throat, little or no attention is given it. But, however insignificant it may seen at first, it is serious and far-reacting in its results.

The foal secretions entering the circulation poison the entire system. The stomach, kidneys—in fact all the organs—feel the effect of this catarrhal poison, and when the lungs are reached its progress is rapid and destructive, and finally ends in consumption.

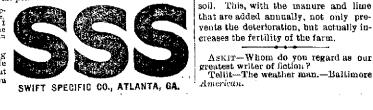

It frequently bappens that the senses of hearing and smell are in part or entirely lost, the soft bones of the mose eaten into and destroyed, causing intense suffering and greatly disfiguring the face. While sprays, the nose eaten into and destroyed, causing intense suffering and greatly disfiguring the face. While sprays, could be increased from 40 to 50 per cent. CATARRH IS A CONSTITUTIONAL OR BLOOD DISEASE,

and far beyond the reach of mere tocal remedies. Those who rely upon them for a cure lose valuable time, meet with disappointment and allow the disease to take firmer hold. Only a real blood remedy can reach this troublesome and dangerous disease.

S. S. cares Catarrh because it first cleanses and builds up the blood, purities it, makes it rich and healthy, stimulates and puts new life into the sluggish worn-out organs, and thus relieves the system of all poisonous accumulations. next year a crop of hay is cut from it, then the second growth comes up and is

Mrs. Josephine Polhill, of Duc West, S. C., writes: "I had Catarrh, which became so deep-seated that I was entirely deaf in one ear, and all inside of my rows, including part of the bone, sloughed off. When the disease had gone this far the physician gave me up as incumble. I determined to try S. S. S. as a last resort, and began to improve at once. It seemed to get at the seat of the disease, and after a few weeks 'treatment I was entirely cured, and for more than seven years have had no sign of the disease." S. S. S. is made of roots, herbs and barks of wonderful tonical and purifying properties. It is the only vegetable blood purifier known, and a certain and safe cure for all blood troubles. Send for our back on Blood and Skin Diseases, and at the same time write our physicians about your case. They will cheerfully give you any information or advice wanted. We make no charge for this.

Three or four years ago Mr. Long con-

nen 5c for every two-cared stalks of corn

This has not been carried far enough to

test and prove its value, but he is con-

vinced that before very long he will have

a variety which will produce a very high

percentage of two-cared stalks. This o

course will materially increase the yield

RESULT OF THOROUGH CULTURE.

is not wholly due to first class seed. Mr

The success in corn culture, however

one year more, thus completing the four

years' rotation. The soil is of limestone

origin, and although stones are being re-

moved constantly they still creep out and

give some trouble. They have been

pretty completely removed, however, so

that it is possible to plow the ground

to a depth of S in. This for corn is al-

ways done in the fall and with a three-

This deep plowing Mr. Long considers

bsolutely necessary if success is to be

had in growing large crops of corn. For

oats and wheat he does not plow so deep.

If deep plowing for corn is not practiced

the drouth and dry weather will injure

the crop during July and August in spite of anything that can be done. Of

course the fields were not plowed S in.

the first years, but after Mr. Long came

into possession of the property he began

by going down one in deeper each year

until the apper 8 in. of soil was thor-

oughly mixed and the fertilizing ele-

nents it contained were evenly distribu-

ted. In spring the ground is prepared

arrows that stir up almost to the depth

of the plowing. Mr. Long believes that

does it. The winter exposure places the soil in the very best possible condition to

supply plant food. He likes to have the

ground loose for corn and oats and be-

lieves in packing only for wheat. With

on the farm, Mr. Long uses no mineral

fertilizer, but carefully applies all the

ground just before it is plowed.

nanure made on the farm to the wheat

A peculiar implement is used for plant-

ing. It is a modification of a riding cul-

tivator with two attachments each some

what similar to a lister. By the plow

attachment to the planter a furrow is

made in the well-prepared soil. The

seed corn is dropped in the bottom of the

furrow and properly covered. May is

the most desirable month for planting in

this section. A single kernel every 18

n. is the ideal stand, but this cannot al

ways he done. Last year, for example

tom of the lister furrow, so as soon as

cultivation begins the soil can be rolled

bout the young plants covering weeds.

but not disturbing the roots. This Mr.

Long considers one of the essentials in

corn culture, as the best returns cannot

be secured if the roots are disturbed in

any way. By this plan the weeds and

grasses can be so successfully held in

check that it it is not necessary to plow

both ways. Level culture is practiced

DISPOSITION OF CORN.

In common with farmers in Pennsyl-

vania, every acre of his corn is cut and

shocked. As soon as the corn is dry

enough it is husked and the fodder haul-

ed to the barn and stored for feed. If

no objection further than that the large

amount of moisture it contains must be allowed to dry out before it is stored.

The most notable feature in all the

be well done. The plowing must be

leep, and manure must be evenly spread

the soil must be free from lumps for

planting, the grains must be dropped about every 18 in., the corn must be kept free from weeds by means of culti-

vators, it must be cut at just the right

The little hours had crawled up to the comb of the roof of night and failen over until three of them were rolling down the far side toward the eaves of morning just as good, but when a solitary footman might have been when tried seen slipping into his own house with his

have failed shoes in his hand. How needless, on, how needless are of tentimes the devices of man! How nugatory and void are oftentimes his mos minstaking efforts l His wife was wide awake and waiting or him when he entered the sauctified

eclusion of their apar ment. "I was so afraid of waking you, dear, he stammered as he let the shoes falfrom his merciless grasp to the floor with a couple of dull thuds so close togethe they seemed as one. She asked him in a stone cold voice

hat time of night. He thanked heaven for an opportunity o explain, he told her a harrowing tale business and delayed trains and telehones out of order and telegraph wires lown and no messengers that wou

She never said a word as she looked straight at him. "Do you doubt me?" he said as if it ignant at the implied suspicion of he. dence, and then pleadingly: "D) you Her face softened, and the fixing of ne-

yes relaxed. "No, William," she responded almos rently, "No: I do not doubt you. At irst there might have been some doub here is none! Not a sandow, William

and I'm as sure that you are lying as that you are standing before me l' Then William bowed his head in shain and turned up the gas-at her request so she could get a better took at thin.

FOR THE GREAT SHOW. The Adam Forepangh and Seils Br. Mires Microsoft of the Managaras Circuses and Hippodromes, which comes to eason's overwhelming success in Madison Soure Garden, New York city, seems so b ully justified in its advertising claims by the many good and impartial things said of it. Every newspaper in New York

praised it to the limit, and Senator Channcey M. Depew voiced the general in saying: "Your show is novel, brilliant up-to-date, exinterating and absolutely ean." "The biggest circus that New York ever saw," says the World, and that just what everyone, everywhere, who nas seen it says. The listed living wor dere and high-class acts and races supply enough entertainment to astonish as earth are filled with the biggest collection of rarest wild beasts, the niggest herds of performing elephants, the biggest troupes

and schools of trained quadrumsts and amphibia, and the biggest circus and hippodrome companies, who present a hor dred splenoid acts and races in three rings, on elevated stages and pedestals, anopied. To particularize would be inmesible, but an idea of the somerelous fucted may be gathered from the fact that employea thousand men and norses, in roduces nineteen great male and fema

Johnston's Sarsaparilla

THE GREAT SPRING MEDICINE.

JOHNSTON'S SARSAPARILLA as a Blend Food and Nerve Energizer, is the greatest SPRING MEDICINE over discovered. It comes as a rich blessing from heaven to the " worn out." the run down the overworked and debilitated. That " tired feeling." those "shiking spells." the languor and despendency which arise from badly nour-Ished nerves from thin, vitiated beautiend an underfed body, vanish as if by a magic spell. The weariners, lassifule and nervous prostration which accompany the springtime and the heat of summer, are conquered and banished at once. For every form of neurasthema, and all allments of the brain and perve, lessomnia hysteria and nervousness generally, it is almost a specific. It formshed the very elements to rebuild worn-out nerve tisaucs. It feeds brain, nerve centers and mayer, calling and equalizing their action; it makes rich, red house blood. Newscar of life, new hope, new strength follow its faithful use. It makes the weak strong, and the old young again, It was the antiquated (but yow happily explained) method in the good old times, to

treat Saft Rheum, Scrofula, Cancer and other troublesome disorders arising from BLOOD TAINT with powerful a tensitives, such as moreury, arsenic and other mineral agents. It was explored by thin treatment that the potent could be killed while the blood was left to course through its channels beloing in its circulation the specific germs of the disease. But in this way, every part of the body became more or less diseased. Nothing can be more terrible than a hearthy destructive bood taint. It not only attacks viruleady the different sire acres of the holy, but many times the bones are honey-combed and destroyed. It often seeds out the nerves and spend cord, and again it will bring decay and death to some vital orgon to the kidneys, liver or stormach. There is only one of the blood must be removed through the exerctory channels, the lungs, kidneys, bowels, liver and edin. * First more, men p. accable. The great restorative, reconstructive and vitalizer of the blood, JOHNSTON'S SARSAPARILLA, not only radically and exhaustively removes the taint, but also removes all mercury, calemel and other minerals. and fills the veine and arteries with the rely, glowing current of vitality. "The blood is SARSAPARILLA, is universally tegat to I as the greatest Blood Purifier ever discovered. This fact is new enablished [1-] and question or cavil.
